# Collection Analysis Summary

## River Bend Middle

Thank you for using Mackin's free Collection Analysis service. We will be contacting you to review the analysis and consult with you about free solutions to improve your collection. In the meantime, here is a summary of your analysis.

In putting the analysis together, we first indicate the average age and number of titles in each part of your collection, then we compare it to a brand new "exemplary" collection that would meet size standards for the number of students in your school. You should then be able to see some of the potential problem areas in your collection and where the collection may fall short of standards. Obviously, what is exemplary for one school may not be completely right for another school, but this does give us a good starting point. You know better than we how your collection is used, so please adapt these recommendations as you see fit.

The following summaries highlight the areas that seem the most in need of attention in the report on the next few pages. Please look at your report closely to determine detailed size, age and weeding needs.

- ✓ With the information you supplied, we were able to successfully categorize 100% of your MARC records.
- ✓ Throughout the collection, the average date of publication is 2015 or 11 years old.
- ✓ The average age is 1 year older than recommended.
- ✓ You currently have 11,911 titles in your collection, of which 11,910 were classified.
- ✓ The recommended number of titles is 12,299, leaving an overall shortage of 389 titles.
- ✓ When looking at the overall balance of each Dewey section, additional titles needed are 6,304.
- ✓ Overall your books per student is nine, while your goal is 10 books per student. This calculation does not include the "Other" Category.
- ✓ Size deficits are greatest in the 900s, Graphic Novel and 500s areas.
- ✓ The oldest areas are the 500s, 000s and 300s.

*"Research consistently demonstrates that well-equipped, quality school library media centers with professional staff directly relate to the academic success of their students." --Keith Curry Lance, 2005*

These facts may be helpful when presenting your analysis to others:

- ✓ One of the primary features of the LSL program—increasing the size of the book collections—was significantly related to increased test scores. On average, each additional book per student that libraries obtained was associated with an increase of 0.44 percentage points in student test scores.<sup>1</sup>
- ✓ Students are more likely to succeed when they have library programs that are well staffed, well funded, technologically well equipped, well stocked, and more accessible.<sup>2</sup>

## Unclassified Call Numbers

If you have a high percentage of items that have not been classified, you can return to the Collection Management home page, select the file name from the "existing collection" drop down menu and go back to modify and/or add categories on the Required and Non-required Categories page. Continue through the rest of the steps then to receive your modified analysis.

If you need assistance at any time, please feel free to call one of our Collection Analysts at 1-800-245-9540.

# Weeding Age Chart

The weeding list indicates the titles in the collection that are as old or older than the ages you requested below.

**We are not necessarily recommending removal of these titles**, but because of their age, you may wish to evaluate them for appropriateness and condition. Please keep in mind that many books may no longer be in print, so you will need to consider that before discarding an item. For example, you may not be able to find replacement items for some Caldecott and Newbery Medal winners.

For more information about weeding contact Collection Management at 1-800-245-9540.

# Weeding Overview

We have prepared some guidelines for weeding, but keep in mind that every library is different; every library has unique priorities and problems. Not every suggestion or guideline for weeding in this section will fit your library, so feel free to adapt as necessary.

## What is Weeding?

*Weeding* is the removing of materials from a library collection in a systematic, deliberate way and is an ongoing part of collection development. *Informal weeding* is an ongoing process that often occurs as materials are checked-in or checked-out. *Formal weeding* is a planned process that is not superseded by informal weeding. A rotation schedule can be established allowing for systematic weeding over time.

## Why is Weeding Important?

Every collection needs to be weeded on a fairly regular basis. Not only does each library have limited space, but collections need to change to stay abreast with changes in the school community and the goals of the library.

Focusing on the quantity of materials in your collection will not improve their quality; in fact, it can actually harm the collection by making it difficult to find the most useful materials, and it also makes your library appear well stocked, even though it isn't. **Funding is far more likely to appear for a library that is not completely full of books.**

## The CREW Method

The CREW Method of weeding is one popular system many librarians use. CREW stands for Continuous Review, Evaluation, and Weeding. The acronym MUSTIE sums up the main criteria used in the CREW Method:

- M = Misleading--factually inaccurate**
- U = Ugly--worn beyond mending or rebinding**
- S = Superseded--by a new edition of by a much better book on the subject**
- T = Trivial--of no discernible literary or scientific merit**
- I = Irrelevant--to the needs and interests of your community**
- E = Elsewhere--material may be obtained expeditiously through interlibrary loan**

Additional criteria to look at for weeding is the frequency that an item is checked out and whether there are multiple copies when only one is needed. Items you may want to consider keeping include classics, local history yearbooks, titles on current reading lists, biographical sources, award winners, school publications, and out-of-print titles that are still useful.

## How to Weed

Design a plan that includes a schedule and goals for the weeding process. Schedule weeding during an uninterrupted time. Have post-its, carts, and boxes available. Look at each book and apply your criteria. If pulling the book, note the reason and place on a cart for mending or in a box for disposal. Having documentation for removal is important in case others question it and it may help with budgeting. Don't forget to remove records from the circulation system.

## Take Action

If you don't have a weeding plan in place and would like help developing a plan, please call Collection Analysis at 800-245-9540.
